# **Fossil Manufacturing LLC.**

## **Fossil 3-Stage Electric Drive Gas-Lift Package**

#### **Standard Features:**

- Advanced PLC based control system with variable speed drive capability.
- Fixed speed or variable speed, based on operator flow range setting.
- Remote monitoring and control (start, stop, reset on selected kills, flow range)
- Capable of operation in a wide range of inlet conditions from 10-75 psi. Wet gas compatible design.
- Heavy duty, oilfield style skid with environmental rail, floor plating and easily accessible service points.
- High speed, Arrow inline compressor frame, prevents horizontal couple for vibration free operation.
- All electric, programmable actuated dumps, dump valves and control devices for worry free-operation.
- No regulated gas on skid, prevents freeze-offs in cold weather operation.
- Variable speed cooler drive allows operator to control inlet temps in all weather conditions.
- Package designed for low noise operation close-in to residential areas.

#### **Options:**

- Sound attenuated wind curtains for cold weather and operation in residential areas.
- Remote monitoring and control via customer's preferred telemetry network.

#### **Capacities:**

- Two-Throw 3-stage 200 HP unit... 250-1000 MSCFD\*
- Four-Throw 3-stage 400 HP unit... **250-2000 MSCFD**\*
