

Fossil Manufacturing LLC.

Standard Vapor Recovery Tower

Standard Features:

- Painted Pallet Tan (other colors available on request).
- Non-Code (coded vessels available upon request).
- Riffle board placed below oil inlet for increased break-up and flash potential.
- 3-point guy wire tie-offs placed on multi-positionable clamp for easy rig-up.
- Gas outlet line to VRU re-positionable up to 360 degrees for easy rig-up.
- Auxiliary oil outlet provided to lower liquid level and prevent flooding during initial well start-up spikes and excessive flow conditions.
- 2" relief valve assembly provided loose.

Options:

- Heavy duty concrete base.
- Guy wire kit with clamps and cable eyelets.
- Sight glass kit with mesh protector.
(above items can be provided as an accessory kit)
- Delivery and set-off at location on 60" towers and below. *(includes dunnage boards, does not include tower set-up)*

432-553-7659

5827 Acton Circle
Granbury, TX 76049

*Actual performance will vary based on gas constituents, flow, pressure, and ambient conditions.
