

Fossil Manufacturing LLC.

Fossil PVRU (Packing Vent Recovery Unit)

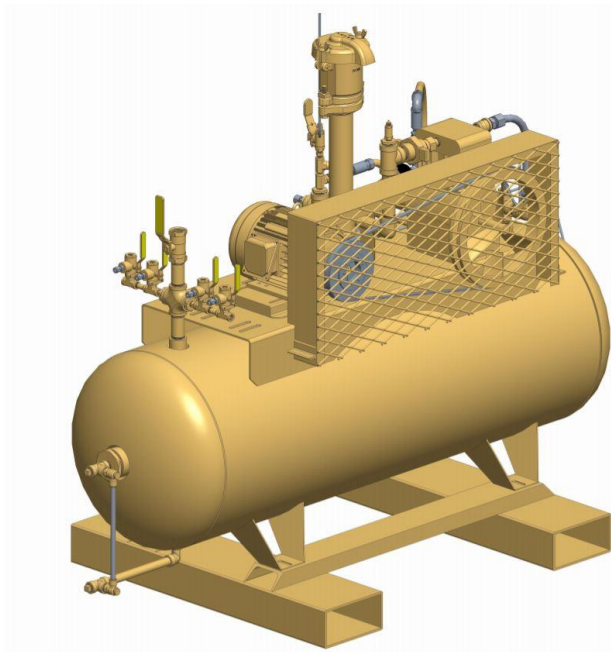

Standard Features:

- Small compact package for easy placement options on location.
- C1D2 rating (requires remote mounting of panel)
- Simple, operator-friendly controls.
- Variable speed drive system for efficient operation on a range of conditions.
- ASME Code inlet vessel.
- Flow monitoring will alarm when vent is increased, signaling operator to repair the worn or faulty packing case.
- Able to handle other sources of gas emissions such as environmental pots, low-bleed gas-actuated control devices, compressor case vent, etc.

Capacities:

- Flow Range: 0-20 mscfd
- Discharge: 0-100 psi
- Inlet Pressure: 0-5 psi

432-553-7659

5827 Acton Circle
Granbury, TX 76049

*Actual performance will vary based on gas constituents, flow, pressure, and ambient conditions. Contact us for more information and a performance evaluation of your application.
